## **DETAILED ACTION**

This office action is in response to application filed on May 02, 2006. Original application contained Claims 1-16. Applicant did not amend or cancel any Claim. Therefore, Claims 1-16 are pending for further consideration

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Petit (U. S. Patent 6,931,381).

1. Regarding Claim 1 Petit teaches and describes a method for using a token to sign an unsigned binary (abstract, Fig.1-2) comprising:

signing an unsigned binary on a first computing device to obtain a first signature and downloading said first signature and said unsigned binary to a second computing device, using a token coupled to said second computing device to sign said unsigned binary to obtain a second signature; and comparing said first and second signatures (col.2 line 50 to col.4 line 40).
2. Regarding Claim 9 Petit teaches and describes a computer program product comprising: a computer usable medium having computer readable program code embodied therein configured to use a token to sign an unsigned binary signature said computer program product (abstract, Fig.1-2) comprising:

computer readable code configured to cause a computer to sign an unsigned binary on a first computing device to obtain a first signature, and computer readable code configured to cause a computer to download said first signature and said unsigned binary to a second computing device, computer readable code configured to cause a computer to use a token coupled to said second computing device to sign said unsigned binary to obtain a second signature; and computer readable code configured to cause a computer to compare said first and second signatures (col.2 line 50 to col.4 line 40).

3. Claims 2-7, and 10-15 are rejected applied as above rejecting Claims 1, and 9

Furthermore, Petit teaches and describes a system a method wherein:

As per Claim 2, and 10 using said unsigned binary on said second computing device, if said first and second signatures match (col.4 line 4 to line 32).

As per Claim 3, and 11 rejecting said unsigned binary on said second computing device, if said first and second signatures do not match (col.4 line 4 to line 42).

As per Claim 4, and 12 said token is a smart card (Fig.1, Item 102, and col.3 line 26 to line 38).

As per Claim 5, and 13 said first computing device is a server (Fig.1, and col.3 line 26 to line 38).

As per Claim 6, and 14 said steps of signing and using use identical hashes (col. 4 line 43 to col.5 line 3).

As per Claim 7, and 15 encrypting said unsigned binary and said first signature (col. 4 line 20 to line 42).

4. Claims 8, and 16 are rejected applied as above rejecting Claims 7, and 14 Furthermore, Petit teaches and describes a system a method wherein:

As per Claim 8, and 16 further comprising: decrypting said encrypted unsigned binary and first signature ((col. 4 line 20 line 62).

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Syed Zia whose telephone number is 571-272-3798. The examiner can normally be reached on 9:00 to 5:00.
